MONITOR

The Safety Command Center allows you to monitor your safety program in real-time with robust reports, active SMS, safety alerts, and more.

AEDs and AED COMPLIANCE

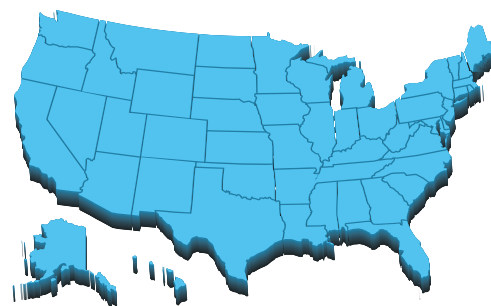

We carry all major brands of FDA approved **AEDs** and all supplies necessary to keep them operational. We also have **AED program management systems** that help you monitor and maintain compliance with your state's AED good samaritan laws including prescription, medical direction, EMS notifications, and more.

Why your company needs to establish an AED program

AED program management is a vital element in having AEDs at the workplace. It's designed to enable your team to effectively respond to a Sudden Cardiac Arrest (SCA) and to manage risk.

- Cardiac arrest is the leading cause of death in the workplace.
- Reduce risk by giving staff the means to save a life with properly deployed AEDs.
- AED program management gives visibility to all of your sites and their level of compliance.

All fifty states have enacted laws and/or regulations that protect organizations who acquire AEDs for their workplace.

FIRST AID and SAFETY

We make it easy to order and maintain your **First Aid Cabinets and Kits** to meet all OSHA and ANSI requirements to keep your employees safe.

SmartCompliance® Cabinets: The cabinets have fixed grids with boxes that stay in place to keep your cabinet organized and uniform.

+ Boxes: Refill boxes are ANSI color coded for easy identification of what items you may need in an emergency.

+ SmartTab® ezRefill System: As supplies are used, a yellow SmartTab® will display when it is time to reorder supplies.

FC Safety makes it easy to comply with CFR 1910.151(b) which requires readily available first aid supplies in most workplace environments.

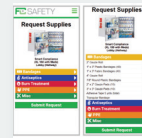

Kits: With a mobile workforce, a variety of first aid kits are available which can protect workers in vehicles, at job sites, or during traumatic events.

Reorder Supplies With The FC Safety Shield®

Review - Check your Smart Compliance® cabinet for low stock or empty first aid boxes. The highly visible yellow Smart Tab® is a great indicator.

Requisition - Within the FC Safety Shield® there is a reorder feature that allows you to select and order necessary product.

Approval - Submit requisition to FC Safety. Orders will be processed within 1 business day.

EMERGENCY PREPAREDNESS

Ready Reserve Safety Cabinet: Your Essential Safety Hub

Ensure your workplace is ready for any emergency or to shelter in place with our fully equipped Ready Reserve Safety Cabinet. Designed to provide immediate access to critical supplies during unexpected situations, this cabinet can include:

- First-aid kits and safety supplies
- Flashlights, batteries, and emergency tools
- Personal protective equipment (PPE)

Stay proactive and safeguard your team with everything needed to respond swiftly and effectively to emergencies. This cabinet can also serve as a stockpile for your first aid cabinets to quickly restock and refill individual items when exhausted.

FIRST AID/AED/CPR TRAINING

Training is an essential component of any comprehensive safety program. These life-saving skills not only ensure a rapid response to emergencies

but are often a required standard for workplace safety compliance. Equip your team with First Aid, CPR, and AED certification so they can act quickly and effectively in crucial situations.

We only teach nationally recognized curricula in a variety of formats including: **traditional, blended, and hybrid** with a virtual option.
